Improving the role of General Practice In Cancer Care

What do GPs in South West Sydney need to provide seamless cancer care? We asked GPs their views about their role in cancer care and about how shared care with cancer services can be improved. Come along and find out what they said....

- What are the challenges for quality shared cancer care identified by GPs in South West Sydney
- Which strategies have GPs identified as likely to improve shared cancer care
- What is the changing role of GPs and secondary services in cancer care
