This new three day course has been developed by the School of Public Health and Community Medicine and the Centre for Primary Health Care and Equity. Course teachers have both program design and evaluation expertise and experience in working with Medicare Locals and Community Health Services. Using real world examples it aims to meet the needs of people working in primary and community health care.

Course Objectives

The course will enable participants to:

- Understand the principles of program logic and apply these to everyday clinical/workplace activities.
- Apply program logic to the design of a program or project relevant to their work.
- Use program logic to formulate (identify) appropriate evaluation questions for process and impact evaluation.

- Identify appropriate designs for evaluation
- Develop a process and impact evaluation plan for a program or project in Primary Care and/or Community Health Care.

When is it?

Course dates Monday 18th to Wednesday 20th November 2013.
