The Centre for Primary Health Care and Equity acknowledges that their offices are built on the traditional lands of the people of the Darug Nation and the Eora Nation, and pays their respect to Elders past and present.
ACKNOWLEDGEMENTS

It is a pleasure to be able to recognise those who support the Centre and work with us towards our aim of fairer better health and health care in the community.

Our supporters include a familiar roll call of organisations, many of whom have been with us for many years: the Faculty and University within which we work, NSW Health who provide essential infrastructure funding through a Population Health and Health Services Research Support Program grant, South Western Sydney Local Health District and the Ingham Institute for Applied Medical research who support CHETRE and the General Practice Unit at Fairfield, with the Ingham Institute also providing accommodation for CHETRE. We also thank the funding bodies who have supported our research: NHMRC, ARC, APHCRRI, to name a few.

Those working with us also includes many familiar names: the School of Public Health and Community Medicine, Muru Marri Indigenous Health Unit, the Australian Institute for Health Improvement and other UNSW researchers and research groups whose work intersects with ours; researchers from universities across Australia and in Canada, New Zealand, the US and the UK; and people from the many government and non-government organisations with whom we work and who are listed in the Partners and Affiliations section on p 45. We are grateful also to the clinicians and service providers across all sectors who take the time to participate in our research and take an interest in our findings.

We acknowledge particularly our partnerships with the Local Health Districts and Medicare Locals in Sydney, south western Sydney and south eastern Sydney. These partnerships keep us in touch with the real world of health services and enabled us to see how our findings apply to primary health care as it is practised.

We are grateful to members of our Steering Committee and Advisory Committee for the support and guidance they give us. Many of them have been with us for a long time, the Chairs, Professors Terry Campbell and Ian Webster since the Centre was formed.

Finally, we thank our staff. They live with short contracts, uncertain funding, and the difficulty of building coherent research programs on an often unpredictable funding base. The work reported here shows how well they continue to respond to this challenge.

BACKGROUND

The Centre for Primary Health Care and Equity has been a UNSW research centre since 2005, building on two groups had been working together since they were founded in 1996. We operate from three locations: on campus at Randwick, at Liverpool (the Centre for Health Equity Training, Research and Evaluation (CHETRE)) and at Fairfield (the General Practice Unit).

Our mission is to contribute to better, fairer health and health care in the community by conducting research, evaluation and development that strengthens primary health care and addresses health inequities. In 2013 our research streams were:

- Prevention and Management of Chronic Disease
- Primary Health Care Informatics
- Primary Health Care System Development
- Family and Social Ecology

We support the uptake of our research findings in policy and practice, and undertake research capacity building, particularly in south western Sydney.

We work across these areas at national, state and local levels. This enables us to investigate health issues at the level of individuals and communities, services and systems as well as putting them in an international context.
MANAGEMENT

2013 Steering Committee

The Steering Committee oversees the work of the Centre, ensuring that it pursues its objectives in line with its terms of reference and is financially sound. The Committee met on 2 April, 30 July and 26 November 2013.

Chair
Professor Terry Campbell Senior Associate Dean, Faculty of Medicine, UNSW Australia

Members
Professor Mark Harris Executive Director, Centre for Primary Health Care and Equity, UNSW Australia
Associate Professor Gawaine Powell Davies CEO, Centre for Primary Health Care and Equity, UNSW Australia
Dr Teresa Anderson Chief Executive, Sydney Local Health District
Professor Ilan Katz Professor, Social Policy Research Centre
Ms Amanda Larkin Chief Executive, South West Sydney Local Health District
Professor Raina MacIntyre Head, School of Public Health and Community Medicine, UNSW Australia
Professor Bill Randolph Director, City Futures Research Centre, Faculty of the Built Environment, UNSW Australia

Secretariat (non-voting member)
Ms Sarah Ford Finance Manager, Centre for Primary Health Care and Equity, UNSW Australia
Message from the Chair of the Steering Committee

In 2013 health reform, which had been gaining momentum over the previous 2-3 years, came up against the policies of a new government. While its directions for the health care system are still emerging, it is clear that there will be considerable change to primary health care organisations, and new strategies will be needed to strengthen primary health care and improve equity. This is likely to have a significant effect on the work of the Centre for Primary Health Care and Equity, which has invested its efforts in supporting health reform and contributing to the development of Medicare Locals. It also increases the need for the kind of engaged research, evaluation and development that is the Centre’s trademark.

In this context the partnerships which the Centre has developed with neighbouring Local Health Districts and Medicare Locals provide a strong foundation for working in an uncertain environment. In 2013 the Centre established the Health Equity Research and Development Unit, a joint venture with Sydney Local Health District, and struck an agreement with the South Eastern Sydney Local Health District to fund five year senior research fellow position to develop links between the Centre’s research and the Local Health District. Together with the long standing support from the South Eastern Sydney Local Health District for CHETRE and the General Practice Unit, this provides a good foundation for the Centre’s research and something of a buffer against difficult times.

In spite of the changing environment, 2013 has been a good year for the Centre. COMPaRE-PHC, the Centre for Obesity Management & Prevention Research Excellence in Primary Health Care based at CPHCE is now well established and in the midst of its research program. IMPACT, a five year Australian-Canadian study of ways of improving access to high quality primary health care is getting underway. The MECSH early childhood home visiting program developed by the Centre in south western Sydney is now being trialled across Australia, and implemented in the UK and Korea. The Primary Health Care Informatics research stream is now well under way, and the Centre was the academic lead for the national evaluation of Medicare Locals. I would like to thank the staff for their hard work during the year, and look forward to further success in 2014.

PROFESSOR TERRY CAMPBELL
Chair, Steering Committee
2013 Advisory Committee

The Advisory Group provides strategic advice to the Centre on its research program. It met on 9 April, 23 July and 15 October 2013.

Chair

Emeritus Professor Ian Webster AO School of Public Health and Community Medicine, UNSW Australia

Members

Ms Tish Bruce Director of Community Health, SE Sydney and Illawarra Local Health District
Ms Solange Frost Senior Policy Officer, Council of Social Services New South Wales
Professor Mark Harris Executive Director, Centre for Primary Health Care and Equity, UNSW Australia
Associate Professor Lynn Kemp Director, CHETRE, UNSW Australia
Mr Lewis Kaplan CEO, GP NSW
Professor Lisa Jackson Pulver Director, Muru Marri Indigenous Health Unit, UNSW Australia
Professor Siaw-Teng Liaw Director, Fairfield General Practice Unit
Professor Raina MacIntyre Head, School of Public Health and Community Medicine, UNSW Australia
Dr Blythe O’Hara Executive Officer, Prevention Research Collaboration, University of Sydney
Associate Professor Gawaine Powell-Davies CEO, Centre for Primary Health Care and Equity, UNSW Australia
Associate Professor Virginia Schmied School of Nursing and Midwifery, University of Western Sydney
Dr Sean Slavin Senior Policy Officer, Strategy and Partnerships Branch, Centre for Population Health, NSW Health
Dr Christine Walker Chronic Illness Alliance, Victoria
Professor Nicholas Zwar Professor of General Practice, School of Public Health and Community Medicine, UNSW Australia
Message from the Chair of the Advisory Committee

As the ground rules change the Centre’s work is never-ending. Changes in health policies, organisational structures and funding inevitably affect the direction of the Centre’s work in prevention and chronic disease management and especially our principal focus on health equity.

The Centre works on a range of issues which do not get the attention they deserve. Hospitals remain the focus of health policy and funding, whereas primary healthcare is neither expected nor well-equipped to fulfil its potential in prevention and in the management of long-term conditions. Marginalised groups remain marginalised, and a focus on efficiency and markets misses the importance of a universal, affordable and equitable health service which does not distinguish between those who can pay and those who cannot. We have prided ourselves in Australia on being social equals, each getting a fair deal. But the evidence from estimates of income inequality and wealth distribution indicate there are widening social divisions in our country.

In addition there are competing views of health – as an attribute of individuals alone or health as an outcome of the values and structures of communities; and of health care as a good to be purchased according to means, with a safety net for those who can’t afford it, or as the entitlement of all citizens.

What then is to be done and how can the Centre help? We must seize the opportunity to look back at how well we have been travelling until this time, to distinguish between the intention and the reality of health reform, and to explore new ways for the values of primary healthcare and equity to be strengthened in these new social conditions. Change brings opportunity, opportunities for new forms for public-private partnerships, for services that can build the capacity of individuals and families to manage their own health, and for new ways of influencing health and social policies to build a healthy society.

This requires imagination and foresight to find new ways ahead. And while there is a sense of urgency and research is necessarily a slow and cautious process, the Centre’s engagement with front-line health services, non-government organisations and other groups, provides the environment in which ideas can be tested in the real world and from which new ideas may grow.

Take for example, information technology. The lives of individuals and organisations are increasingly dependent on information technology. Governments use websites and other portals to provide health information and access to personal health data for individuals and organisations. And health organisations depend heavily on information technology to communicate, administer and deliver health services. Thus the growing expertise and interest in information technology in the Centre will keep primary health care locked into these sweeping developments and enhance the engagement with contemporary health problems.

The Advisory Committee expresses its appreciation to Professors Terry Campbell and Mark Harris and Associate Professor Gawaine Powell Davies for their leadership and stewardship of the Centre. We admire the quality of the work in each research stream. For those beginning research we wish them productive and fulfilling research careers in the future.

As Chair, I thank each member of the Advisory Committee for their continuing interest and support and for the soundness of their advice based on wide experience and knowledge.

The Advisory Committee thanks the external funding bodies, the University, the Faculty of Medicine and the School of Public health and Community Medicine for their practical support and encouragement.

EMERITUS PROFESSOR IAN W WEBSTER AO
Chair, Advisory Committee
CPHCE Board of Directors

Executive Director
Professor Mark Harris

Chief Executive Officer

Professor Siaw-Teng Liaw
Professor Nicholas Zwar
Message from the Executive Director

In 2013 we developed a new health stream, Primary Care Informatics, and we have continued to develop research units with Sydney and South East Sydney Local Health Districts and Medicare Locals in addition to our long standing partnerships and structures in South West Sydney. In addition to COMPaRE- PHC, the Centre for Obesity Management and Prevention Research Excellence in Primary Health Care, we have a major role in the IMPACT CRE – a Canadian Australian collaboration focused on improving access to primary health care by vulnerable and disadvantaged population groups.

A number of research programs entered new phases of work. Children in the Gudaga cohort, which began at birth are now in primary school and new projects focusing on assessment of their health and education performance commenced. The Centre completed work on the national evaluation of Medicare Locals, the NSW Severe Chronic Disease Management Program and two large NHMRC projects – one on COPD and one on the prevention of vascular disease in general practice (PEP). We completed linked data research focused on preventive care and quality of care for patients with diabetes.

We continued to translate our completed work into publications and presentations which have informed policy and practice. The Miller Early Childhood Home Visiting Trial (MESCH) program was taken up in the UK and South Korea as well as in Australia. CPHCE’s research has continued to inform government health policy at state and national levels. In addition, our involvement with Medicare Locals, engagement with policy makers and dissemination of research findings through academic publications and presentations have been supporting health reform.

We have a broad range of partnerships with other researchers, policymakers, practitioners, local communities and consumers. During 2013 we received visiting fellowships from a number of international researchers including: Professor William Dietz, former director of the Division of Nutrition and Physical Activity at the Centers for Disease Control and Prevention USA, visited on obesity in children; Professor David Weller from Edinburgh University in Scotland on cancer management in primary care; Professor Ann Rogers and Anne Kennedy from Southampton University in the UK on self-management; Prof. Chris van Weel from the Netherlands; Dr Nick Goodwin from the Kings Fund; and Dr Michiko Hoshiko from Kurume University in Japan.

Looking Forward

In 2013 and beyond CPHCE will continue to develop research on:

- health informatics in primary care linking practice and diabetes service electronic health records to better understand how chronic disease management is shared in the “medical neighbourhood”
- improvement the quality and appropriateness of primary health care for Aboriginal and Torres Strait Islander peoples
- improving access to primary health for vulnerable populations
- improving implementation of preventive care especially for patients with low health literacy.

CPHCE will continue to develop partnerships with Local Health Districts and Medicare Locals in NSW to conduct research and evaluation which is relevant to their needs and priorities and strengthen our international collaborations and the Centre’s international profile.

PROFESSOR MARK HARRIS
Professor of General Practice and Executive Director,
UNSW Research Centre for Primary Health Care & Equity, UNSW
STAFF

All staff employed through the Centre during 2013 (including long term casual staff) are listed below. Those with an asterisk have since left. As at November 2013, there were 48 staff members (34.24 FTEs).

Professor

RESEARCH

The Centre has four research streams, with a number of sub-programs.

Research projects active in 2013 are listed below by stream. The chief investigator is named first (in bold) followed by the project coordinator (underlined). Other members of the research team are listed in alphabetical order, and affiliations are provided for those who are not part of CPHCE. The source of funding is given in brackets. For further details of projects, please see our web site (www.cphce.unsw.edu.au)
Prevention and management of chronic disease stream

Our research on the prevention and management of chronic disease in primary health care addresses a broad range of problems currently confronting the health system as it struggles to deal with the increasing burden of chronic disease. These include innovations in the roles of health care providers within the primary care team, engagement of patients in their own care, use of new information and decision support and quality improvement strategies, and better coordinated referral and coordination between PHC care providers.

Improving chronic disease management

This program focuses on improving the quality of care for a range of chronic disease in PHC including diabetes, chronic respiratory and cardiovascular disease, cancer and patients with multiple conditions including chronic physical and mental illness. The theoretical basis of this work includes the expanded chronic illness model which identifies the support systems and organization required for optimal patient centered chronic disease management including new roles for primary care providers especially practice nurses, support for patient self-management, decision support and information systems. This program is increasingly focusing on patients with multi-morbidities in primary health care.

Projects

Attitudes to cancer follow up in general practice: Translational Cancer Research Network (TCRN) UNSW
Research Team: Mark Harris, David Weller

Culturally appropriate diabetes care in mainstream general practice for urban Aboriginal & Torres Strait Islander people (NHMRC)
Research Team: Siaw-Teng Liaw, John Furler (Department of GP, University of Melbourne), Margaret Kelaher (Onemda VicHealth Koori Health Unit, University of Melbourne), Phyllis Lau (Department of GP, University of Melbourne), Priscilla Margaret Pyett (Monash University), Kevin Rowley (Onemda VicHealth Koori Health Unit, University of Melbourne)

Models of access and coordination of care for refugees (APHCRI)
Research Team: Mark Harris, Margaret Alston (Monash), Bibiana Chan, I-Hao Cheng (Monash), Chandni Joshi, Margaret Kay (University of Queensland), Winston Lo, Kevin Pottie (Ontario), Grant Russel (Monash), Mitchell Smith, Shiva Vasi (Monash), Sayed Shukrullah Wahidi (Monash)

PELICAN: A cluster randomised trial of early intervention for Chronic Obstructive Pulmonary Disease by practice nurse - GP teams (NHMRC)
Research Team: Nicholas Zwar, Jeremy Bunker, Alan Crockett (University of Adelaide), Sarah Dennis, Iqbal Hasan, Oshanah Hermiz, Sandy Middleton (Australian Catholic University), Helen Reddel (Woolcock Institute, University of Sydney), Onno van Schayck (Maastricht University), Sanjyot Vagholkar

Primary Health Care for Aboriginal people exiting the criminal justice system
Research Team: Jane Lloyd, Mark Harris

Quality Improvement in general practice
PhD Student: Barbara Booth; Supervisors: Mark Harris and Nicholas Zwar
PhD Student: Anna Williams; Supervisors: Patricia Bazeley and Mark Harris

Shifting ground, common ground. Understanding the evolving care practice. Inter-country comparative study Canada USA and Australia (Canadian Institute for Health Research)
Research Team: William Hogg (University of Ottawa), Ben Crabtree (University of New Jersey), Jane Gunn (Melbourne University), Mark Harris, Jean-Fred Levesque (Université de Montréal), Siaw-Teng Liaw, Julie McDonald, William Miller (Pennsylvania State University), Gawaiine Powell Davies, Grant Russell (Monash University), Catherine Scott (Alberta Health Services)

Preventing chronic disease

Our research in prevention has focused on the behavioural risk factors (smoking, nutrition, alcohol, physical activity) and the physiological conditions which predispose to chronic diseases (obesity, hypertension, dyslipidaemia, and pre-diabetes). We have developed and evaluated interventions based on the 5As framework (Assess, Advise, Agree, Assist, Arrange) across the life-cycle. A particular focus is on the management of overweight and obesity and preventive care for disadvantaged groups with low health literacy. The research has included mixed method feasibility studies, quasi experimental and cluster randomized trials in both general practice and community health services. The interventions have included interactive training of health professionals in assessment of risk and motivational interviewing, enhancing the role of practice nurses, supporting referral and uptake of individual and group diet and physical activity education programs, and long term follow up and support. This research has informed NSW and Australian Government health policy and been translated into guidelines and resources for practitioners.

Projects

Cardiovascular absolute risk assessment in general practice and impact on prescribing.
PhD Student: Sanjyot Vagholkar; Supervisors: Mark Harris and Nicholas Zwar

Centre for Obesity Management and Prevention Research Excellence in Primary Health Care (COMPaRE-PHC) (APHCRI)
Research Team: Mark Harris, Catherine Spooner, Deborah Askew (Queensland Health- Inala Indigenous Health Service), Adrian Bauman (University of Sydney), Kylie Ball (Deakin University), Iain Broom (Robert Gordon University), Karen Campbell (Deakin University), Ian Catserson (University of Sydney), David Crawford (Deakin University), Elizabeth Denney-Wilson (University of Technology Sydney), Noel Hayman (Queensland Health - Inala Indigenous Health Service), Upali Jayasinghe, Jonathon Karnon (University of Adelaide), Rachel Laws (Deakin University), Siaw-Teng Liaw, John Lynch (University of Adelaide), Gawaiine Powell Davies, Deborah Schofield (University of Sydney), Nigel Stocks (University of Adelaide), Julie Will (Centres for Disease Control and Prevention)

A number of projects are being undertaken in the Centre as part of COMPaRE-PHC including:

- Better Management of Weight in General Practice (BMWP)
  Research Team: Mark Harris, Nighet Faruqi, Elizabeth Denney-Wilson (UTS), Nouhad El-Haddad, Oshana Hermiz, Rachel Laws (Deakin University), Siaw-Teng Liaw, Jane Lloyd, Catherine Spooner, Nigel Stocks (University of Adelaide)

- Health economic analysis of a model for implementation of guidelines
  Research Team: Mark Harris, Jodi Gray (University of Adelaide), Jonathon Karnon (University of Adelaide), Sharon Parker, Catherine Spooner, Nigel Stocks (University of Adelaide)

- Health literacy interventions for weight management
  Research Team: Mark Harris, Catherine Spooner, Deborah Askew (Inala Indigenous Health Service), Sarah Dennis (University of Sydney), Nighet Faruqi, Chandni Joshi, Jane Lloyd, Nigel Stocks (University of Adelaide), Jane Taggart

- Referral of obese patients in primary care
  Research Team: Mark Harris, Ian Catserson (University of Sydney), Elizabeth Denney-Wilson (UTS), Jonathon Karnon (University of Adelaide), Kyoung Kon Kom (Gachon University of Medicine and Science), Rachel Laws (Deakin University), Siaw-Teng Liaw, Megan Passey (University of Sydney), Catherine Spooner, Lin-Lee Yeong
Coordinated primary health care for refugees. A best practice framework for Australia (APHCRI)
Research Team: Grant Russell (Monash), Mark Harris, Chandni Joshi, Winston Lo

Implementing guidelines to routinely prevent chronic disease in general practice (PEP) (NHMRC partnership grant, BUPA)
Research Team: Mark Harris, Sharon Parker, Raghib Ahmad, Chris del Mar (Bond University), John Litt (Flinders University), Danielle Mazza (Monash University), Gawaine Powell Davies, Grant Russell (Monash University), Richard Taylor (SPHCM, UNSW), Mieke van Driel (University of Queensland), Nicholas Zwar

Prevalence of mental health problems in patients attending Vietnamese general practices in SW Sydney (GPet)
Research team: Siaw-Teng Liaw, Thi Nguyen (SWSLHD), Huy An (General Practitioner), Sarah Dennis, Sanjyot Vagholkar

SEEF Equity study: access to preventive and primary health care (NHMRC)
Research Team: Mark Harris, Elizabeth Comino, Fakhrul Md. Islam

Supporting teamwork to enhance preventive care provided for disadvantaged patients in general practice (UNSW Faculty of Medicine Gold Star)
Research Team: Mark Harris, Raghib Ahmad, Nighat Faruqi, Jane Lloyd

Torpedo study: cardiovascular risk assessment and management in primary care. (NHMRC funding agreement with George Institute)
Research Team: David Peiris (George Institute), Mark Harris, Sharon Parker, Nicholas Zwar

Understanding the impact of social, economic and geographic disadvantage on the health of Australians in mid-later life: What are the opportunities for prevention? (NHMRC through Sydney University)
Research Team: Adrian Bauman, Jack Chen, Elizabeth Comino, Mark Harris, Fakhrul Md. Islam, Bin Jalaludin (SWSLHD)

Data collection van for the Gudaga projects. Thanks to Macarthur Automotive
A strong primary health care system is essential to a cost-effective health system. Much of our work in 2013 was directed towards understanding and supporting changes in primary health care following the national health care reforms, in particular the establishment of Medicare Locals and the shift towards activity based funding in Local Health Districts. This has provided opportunities for considering how important primary health care principles play out in new settings.

We have also continued our work in investigating access to primary health care, and our capacity building work through the Primary and Community Health Research Unit within south western Sydney.

Improving Integration of Services and Coordination of Care

Health reforms have opened up new challenges and new opportunities for integrating services and improving coordination of care, within and across sectors. We investigated this and other aspects of primary health care development in two large scale evaluations: the national evaluation of Medicare Locals and the process evaluation of the NSW Health Chronic Disease Management Program. We also worked with Medicare Locals and Local Health Districts to develop new approaches to primary health care provision.

Projects

An evaluation of the development, implementation, feasibility and impact of a tailored intervention to improve the quality of care for Aboriginal and Torres Strait Islander peoples attending general practice (NHMRC PhD scholarship)

**PhD student:** Heike Schütze; **Supervisors:** Mark Harris, Elizabeth Harris, Lisa Jackson Pulver

Assisting Medicare Locals with planning for afterhours primary medical care (Eastern Sydney Medicare Local, South Eastern Sydney Medicare Local and South Western Sydney Medicare Local).

**Research Team:** Julie McDonald, Gawaine Powell Davies, Pauline Foote, Lesley Garton (SWSML), Tom Powell Davies

Can Get Health in Canterbury (Sydney LHD, Inner Western Sydney ML)

**Research Team:** Elizabeth Harris, Penny Findlay, Tracey Wills (IWSML)

Evaluation of the NSW Chronic Disease Management Program (NSW Health)

**Research team:** Gawaine Powell Davies, Julie McDonald, Laurent Billot (The George Institute), Alan Cass (The George Institute), Anne-Marie Feyer (The George Institute), Marion Haas (CHERE), Mark Harris, Alina McDonald (The George Institute), Fiona Turnbull (The George Institute), Rosalie Viney (CHERE), Nicholas Zwar

Evaluation of the Prevention in Primary Health Care SNA Program (NSW Heart Foundation)

**Research team:** Julie McDonald, Gawaine Powell Davies

How can the primary health care system better support Aboriginal Australians released from the criminal justice system? (APHCRI)

**Research team:** Jane Lloyd, Penny Abbott (UWS), Eileen Baldry (School of Social Sciences and International Studies), Mark Harris, Devon Indig (Centre for Health Research in Criminal Justice), Elizabeth McEntyre (Awabakal Newcastle Aboriginal Cooperative), Sonya Nicholl (Justice Health), Jennifer Reath (UWS), Carla Saunders (SES LHD), Juanita Sherwood (UTS), Dea Thiele (AMS Western Sydney)
National evaluation of Medicare Locals (Department of Health and Ageing)
Research team: Gawaine Powell Davies, Jenny Advocat (Monash), Karen Edwards (Ernst and Young), Elizabeth Harris, Mark Harris, Thieu Hue Lam (Ernst and Young), Riki Lane (Monash), Siaw-Teng Liaw, Julie McDonald, Grant Russell (Monash), Sheena Wu (Ernst and Young), Nicholas Zwar

Qualitative study of two Superclinics (RACGP and Monash University)
Research team: Grant Russell (Monash University), Mark Harris, Gawaine Powell Davies, Nicholas Zwar

Use of services by homeless people in South Eastern Sydney LHD (SESLHD)
Research team: Julie McDonald, Gawaine Powell Davies

Professor Mark Harris and Professor Zhaokang Yuan of School of Public Health, Nanchang University (left) working together at CPHCE
Access to Primary Health Care

Our work with linked data collections continues to develop. Record linkage at a person level had the potential to explore questions about access to health service that may not be able to be addressed when using the same data bases individually. Using data from the 45 and Up Study, one of the largest studies of healthy aging conducted to date, we have continues to explore the association between primary care and health outcomes. During the past year we have developed a proposal to extend our current linked data to clinical data held by the four key pathology companies. This will make it possible to examine the relationship between clinical control of diabetes risk factors such as hyperglycaemia, access to quality primary care, and health outcomes including complications and hospitalisation, and extend our understanding of the role of primary health care in improving population health outcomes.

Projects

Investigating best practice primary care for older Australians with diabetes using record linkage: a pilot study (NHMRC)
Research team: Elizabeth Comino, Jeff Flack (SWSLHD), Marion Haas (UTS), Mark Harris, Bin Jalaludin (SWSLHD), Louisa Jorm (UWS), Gawaine Powell Davies, Kris Rogers (SAX Institute)

Optimising access to ‘best practice’ primary health care (APHCRI)
Research Team: Elizabeth Comino, Bettina Christl, John Furler (University of Melbourne), Marion Haas (UTS), Jane Hall (UTS), Mark Harris, Yordanka Krastev (University of Sydney), Gawaine Powell Davies, Antony Raymont (Victoria University, NZ)

Relationship between ‘best practice’ primary care, health status, hospitalisation, and death for general practice patients with diabetes.
Research team: Elizabeth Comino, Tom Chen, Jeff Flack, Mark Harris, (SWSLHD), Siaw-Teng Liaw, Warwick Ruscoe (Southern Highlands DGP), Jane Taggart, Duong (Danielle) Tran
Primary and Community Health Research Unit (PCHRU)

PCHRU is a program of research capacity building in community health in South Western Sydney Local Health District. During 2013/2014 PCHRU was funded through the Division of Community Health, South West Sydney Local Health District. PCHRU is a collaborative activity of UNSW, UWS, SWSML and SWSLHD. Oversight is provided by the PCHRU Advisory Group comprising the major collaborators and the Community Health Research Advisory Group.

Projects

“Falling in between the cracks” - barriers to diabetes self-management in culturally diverse but linguistically-able patients from non-English speaking backgrounds  
_Please note: research team names are listed as of the time the report was published._

- **Research Team:** Della Maneze (SWSLHD), Elizabeth Comino, Emma Friesen, Anau Speizer (SWSLHD), Daisy Yogendran (SWSLHD)

Implementation of AAC systems for children with physical disabilities and complex communication needs  

- **Research Team:** Kate Margetson (SWSLHD), Sarah Carman (SWSLHD), Elizabeth Comino, Emma Friesen, Kate Short (SWSLHD & USyd)

Macarthur Sexual Assault Service Referral and Client Profile – Analysis and Trends 2001-2010  

- **Research Team:** Alison Huggan (SWSLHD), Debbie Allan (SWSLHD), Elizabeth Comino, Emma Friesen, Trin Ha (SWSLHD)

Pap test screening for cervical precancer in women with a history of substance use in drug and alcohol rehabilitation services

Review of the SWSLHD Social Work Model of Care  

- **Research Team:** Lissy Tressa (SWSLHD), Elizabeth Comino

Supporting families not engaging with Child Protection services when clinicians have wellbeing or child protection concerns  

- **Research Team:** Belinda Mawhinney (SWSLHD & SLHD), Elizabeth Comino, Vanda De Silva (SWSLHD), Kim Dunlop (SWSLHD), Melissa Harnett (SWSLHD), Sarah Marsh (SWSLHD), Rhonda Mather (SWSLHD), Alison Tutt (SWSLHD)
Family and social ecology research stream

This research stream applies a family and social ecology framework, recognising that health, development and wellbeing are the product of complex interacting factors at the individual, family, community and environmental levels. We conduct multilevel research that requires participatory research processes where interventions and innovations are embedded within systems and built on a relationship between local research institutions and the professional and broader community. Through this approach we undertake practice and policy relevant research that provides high quality research reports and peer-reviewed publications, and direct support for practice and service development and capacity building.

Children and Young People

This program focusses on understanding the needs of vulnerable families (including families at risk of poorer child health and development outcomes, families living in lower socioeconomic communities and Aboriginal families) and developing and trialling interventions to improve child and young people's health, development and educational outcomes, including individual, family and service system interventions. This research program is grounded in the evidence about the importance of the early years, and targets families with children from antenatal (pregnancy) to the second decade of life.

The Gudaga study is a longitudinal birth cohort study of the health, development and service use of Aboriginal children in Campbelltown, conducted in partnership with the local Tharawal Aboriginal community. We are now working with education researchers to study the Gudaga children's transitions into the early years of school. We are also auditing local child and family services to better understand the relationships between child outcomes and local service context. This audit will also examine culturally appropriate practice and models of service delivery. The Bulundidi Gudaga project is trialling an Indigenous early childhood sustained nurse home visiting program based on the MESCH (Maternal Early Childhood Sustained Home-Visiting) model, which has previously shown to improve outcomes for vulnerable families.

There is rapidly growing international interest in the MESCH program which is now being rolled out and trialled across Australia, the UK and South Korea. We have also formed a research collaboration with Good Beginnings Australia, the Benevolent Society and Karitane to trial a volunteer home visiting program in four Australian states, and are working in a number of forums to develop more integrated, whole-of community models of service delivery.

Projects

An ecological study of school transition and the early years of school for Aboriginal children in an urban location (ARC)

*Research Team:* Lynn Kemp, Rebekah Grace, Cheryl Jane Anderson, Elizabeth Comino, Sue Dockett (Charles Sturt University), Melissa Haswell-Ekins (Muru Marri Indigenous Health Unit, UNSW), Lisa Jackson Pulver (Muru Marri Indigenous Health Unit, UNSW), Cathy Kaplun, Jenny Knight, Fakhra Mann, Bob Perry (Charles Sturt University), Sheryl Scharkie, Natasha West, Anna Williams

Bulundidi Gudaga (Closing the gap: improving Aboriginal maternal and child health in Macarthur) (NHMRC)

*Research Team:* Lynn Kemp, Rebekah Grace, Cheryl Jane Anderson, Trish Clark (SWSLHD), Elizabeth Comino, Elizabeth Harris, Mark Harris, Lisa Jackson Pulver (Muru Marri Indigenous Health Unit, UNSW), Jennifer Knight, John Lynch (University of SA), Jenny McDonald (SWSLHD), Cathy McMahon (Macquarie University), Sheryl Scharkie, Vicki Wade (SWSLHD), Natasha West, Darryl Wright (Tharawal Aboriginal Corporation)
Evaluation of the Healthy Learner Project in a disadvantaged high school (Mounties)
Research team: Siaw-Teng Liaw, Sarah Dennis, Edward Noon (Ashcroft High School)

MECSH Program Licence and Service agreement (Essex and Plymouth, United Kingdom; Australian Research Alliance for Children and Youth, Victoria and Tasmania)
Research Team: Lynn Kemp

Sustained nurse home visiting: who benefits, why and how? (PhD study)
PhD candidate: Siggi Zapart; Supervisors: Lynn Kemp, Jenny Knight

The Gudaga Study: Describing the health, development, early education, family environment and service context of Aboriginal children aged five to nine years in an urban location (Gudaga III) (NHMRC, SWSLHD)
Research Team: Elizabeth Comino, Jennifer Knight, Cheryl Jane Anderson, Rebekah Grace, Lisa Jackson Pulver (Muru Marri Indigenous Health Unit, UNSW), Bin Jalaludin (SWSLHD), Catherine Kaplun, Lynn Kemp, Kelvin Kong, Fakhrat Maan, Jenny McDonald (SWSLHD), Cathy McMahon (Macquarie University), Sheryl Scharkie, Natasha West

Volunteer Family Connect: Effective care to improve the health of families with young children and their volunteer carers (Benevolent Society, Good Beginnings Australia, Karitane)
Research Team: Rebekah Grace, Saul Flaxman (Benevolent Society), Les Hems (Centre for Social Impact), Lynn Kemp, Yvonne McCann (Karitane), Heather Smith (Good Beginnings Australia), Jaimie Tredoux, Jayne-Meyer Tucker (Good Beginnings Australia), Graham Vimpani (University of Newcastle)

Communities and Populations

This program focuses on the health and wellbeing of whole communities and populations. This research program is grounded in the evidence about the positive and negative impacts of the social determinants of health and their distribution within our society: These inequities in health, avoidable health inequalities, arise because of the circumstances in which people grow, live, work, and age, and the systems put in place to deal with illness. The conditions in which people live and die are, in turn, shaped by political, social, and economic forces. Research in this program is conducted with communities, populations and organisations, and addresses planning and policies.

In 2013 we continued to undertake research, training and capacity building in complex community intervention and to engage with local intersectoral partners including local government, NSW Land and Housing Corporation, Housing NSW, Department of Family and Community Services and SWSLHD. Community STaR, our flagship training and research centre funded by Liverpool City Council, undertook a series of community activities to explore social cohesion. We continue to undertake supervision and mentoring of undergraduate and postgraduate research and practice students in the areas of health promotion, medicine and social work.

Our health impact assessment (HIA) program continues to support the undertaking of HIA locally, nationally, and internationally, including work in South America and Africa.
Projects

Community 2168 research and training hub (Liverpool City Council, NSW Department of Community Services, SWSLHD)

*Research Team:* Vanessa Rose, Harrison Ng Chok, Joan Silk

Equity Focused Health Impact Assessment for SLHD Environmental Health Services Workers (SLHD)

*Research team:* Elizabeth Harris, Heike Schütze

Equity Focused Health Impact Assessment: Hospital in the Home (SLHD)

*Research team:* Elizabeth Harris

Equity-focused Health Impact Assessments on Medicare Locals’ strategic plans (APHCRI)

*Research team:* Elizabeth Harris, Fran Baum (Flinders University), Sarah Dennis, John Furler (University of Melbourne), Fiona Haigh, Patrick Harris, Ben Harris-Roxas, Lynn Kemp, Angela Lawless (Flinders University), Marilyn Wise

Equity Focused Health Impact Assessment: Sydney LHD Strategic Plan 2012-2017 (SLHD)

*Research Team:* Elizabeth Harris, Sarah Simpson (World Health Organization), Marcia A Grand Ortega (SPHCM, UNSW)

Evaluation of Community 2168 Community Regeneration Intervention (Liverpool City Council, Housing NSW, SWSLHD)

*Research Team:* Vanessa Rose, Joan Silk, Elizabeth Harris, Harrison Ng Chok, and the Community 2168 Management Committee

From advocacy to action: Utilising Health Impact Assessment as a tool to realise the right to health (NHMRC PhD Scholarship)

*PhD Student:* Fiona Haigh; *Supervisors:* Lynn Kemp, Vanessa Rose

Influencing health and wellbeing considerations in EIA, and application in local government (Population Health, South Western Sydney & Sydney Local Health Districts)

*Research team:* Patrick Harris, Harrison Ng Chok

HIA Training and Support, Western Australian Dental Service (Western Australia Health)

*Research team:* Patrick Harris

HIA Training and Support, Ghana (SOS International)

*Research team:* Patrick Harris

Housing and Health Partnership (Population Health, South Western Sydney & Sydney Local Health Districts, NSW Health)

*Research team:* Patrick Harris, Anthony Hartley (NSW Department of Family and Community Services), Peter Sainsbury (SWSLHD), Mark Thornell (SWSLHD)

National appraisal of Continuous Quality Improvement initiatives in Aboriginal and Torres Strait Islander primary health care (Lowitja Institute)

*Research team:* Marilyn Wise, Sandra Angus, Elizabeth Harris, Sharon Parker

Points of health influence in the Housing NSW Master Planning process (Population Health, South Western Sydney & Sydney Local Health Districts)

*Research team:* Patrick Harris, Fiona Haigh, Lynn Kemp, Mark Thornell (SWSLHD)

Working in locationally disadvantaged communities: learning by doing program

*Research Team:* Elizabeth Harris, Vanessa Rose, Joan Silk
Primary health care informatics stream

The growing health care needs of the ageing population, scarcity of resources and increasing costs of health care delivery in the management of chronic disease have emphasised the need for up-to-date information, and knowledge management and exchange. The Primary Health Care Informatics agenda includes the good design of electronic health records (EHRs) and electronic decision support to achieve a patient-centred integrated PHC system that is accessible and equitable, which emphasises prevention and early detection, and has good clinical and corporate governance.

In this context, the UNSW electronic Practice Based Research Network (ePBRN), a collegial network of computerised general practices, Area/District Health Services and other health providers involved with integrated care in the Fairfield health neighbourhood was established. ePBRN members receive feedback and act on the quality of clinical information in an ongoing quality improvement program. Informatics methods, developed with collaborators in UK, Canada and USA, are used to manage extremely large data sets.

The recent recognition of UNSW Australia as a WHO Collaborating Centre (eHealth) reflects UNSW's significant research strength in informatics and eHealth research.

A number of eHealth and informatics driven translational research programs in UNSW Australia support and are supported by the PHCI stream activities. This research stream has strong links to the WHO Collaborating Centre for e-Health and the Centre for Health Informatics at UNSW. An agreement has also been signed between the CSIRO and UNSW to make the data from the CSIRO telemonitoring project available to Professor Liaw to use for projects to be undertaken by prospective ILP, Masters and/or PhD students.

Projects

An assessment of community readiness for mHealth in rural Bangladesh (AusAid)
**PhD Student:** Fatema Khatun; **Supervisors:** Siaw-Teng Liaw, Anita Heywood (SPHCM, UNSW), Pradeep Ray (APuHC)

Establishing the UNSW ePBRN (Faculty & MREII)
**Research team:** Siaw-Teng Liaw, Jane Taggart, Tom Chen, Elizabeth Comino, Sarah Dennis, Mark Harris, Bin Jalaludin (SWSLHD), Gawaine Powell Davies, Sanjyot Vaghilkar, Nicholas Zwar

Healthy me to optimise the management of asthma (CRE in eHealth) (NHMRC)
**Research team:** Annie Lau (CHI), Amael Arguel (CHI), Sarah Dennis, Siaw-Teng Liaw

Information-enhanced integrated care research in SW Sydney (Sydney SW Integration Program)
**Research Team:** Siaw-Teng Liaw, Jane Taggart, Jeremy Bunker, Tom Chen (SWSLHD), Sarah Dennis, Bin Jalaludin (SWSLHD), Della Maneze (SWSLHD), Sanjyot Vaghilkar, Nicholas Zwar

Mobile health in aged and disadvantaged communities (WHO Collaborating Centre (eHealth))
**Research team:** Pradeep Ray (APuHC), Raina MacIntyre (SPHCM, UNSW), Siaw-Teng Liaw

NPS MedicineInsight Pilot (NPS)
**Research team:** Siaw-Teng Liaw, Nighat Faruqi, Mark Harris, Oshana Hermiz, Heike Schütze
Ontology-based approaches to identify patients with type 2 diabetes mellitus from electronic health records: Development and Validation (Iran Government)
PhD Student: Alireza Rahimi; Supervisors: Siaw-Teng Liaw, Pradeep Ray (APuHC)

Safety of GP information systems (Centre for Health Informatics) (NHMRC)
Research team: Farah Magrabi (CHI), Michael Kidd (Flinders), Siaw-Teng Liaw

The accuracy of existing data extraction tools from GP EHRs (NPS)
Research team: Siaw-Teng Liaw, Andrew Knight, Joel Rhee, Michael Tam, Jane Taggart, Hairong Yu, Nicholas Zwar

The ePBRN as a PHCI infrastructure and platform for projects
Research team: Siaw-Teng Liaw, Jane Taggart, Enrico Coiera (CHI), Elizabeth Comino, Simon de Lusignan (University of Surrey), Geoff Delaney (SWLHD Cancer Services), Sarah Dennis, Mark Harris, Andrew Hayen (SPHCM), Bin Jalaludin (SWLHD), Gawaine Powell Davies, Pradeep Ray (APuHC), Hairong Yu, Sanjyot Vagholkar, Nicholas Zwar

Using the electronic Practice Based Research Network (ePBRN) to prevent re-admission for type-2 diabetes (HCF)
Research Team: Sarah Dennis (University of Sydney), Mark Harris, Bin Jalaludin (SWLHD), Siaw-Teng Liaw, Alan McDougall (SWLHD), Rene Perneck (SWSM), Gawaine Powell Davies, Jane Taggart, Hairong Yu, Nicholas Zwar
At school and in the HSC I did very well in mathematics, and I got a scholarship through the Department of Education in Sri Lanka to pursue a degree in mathematics in Moscow. The medium of instruction was Russian and I did not know any Russian before I went to Moscow. We were taught Russian for a year: I picked it up very well as we had to use it 24/7 in our day-to-day life. During my six years in Moscow, I used to travel to other European countries by train in the summer holidays - it took two days to travel from Moscow to London by train. At the university I won the mathematical Olympiad. I completed a Masters Degree in Mathematics and after graduating went to Germany for few months and then returned to Colombo.

In Sri Lanka my first appointment was at a technical institute as a lecturer in mathematics. After a while I decided to change my field from mathematics to statistics as I love to understand the application of statistics to real-world situations. I did two graduate diplomas in statistics and applied statistics and was successful in getting a position as the statistician at the University Grants commission. Before emigrating to Australia in 1995, I was employed as the Head of Computer and Statistics Division at the State Mortgage and Investment Bank, Sri Lanka.

I was first employed at the UNSW Australia (UNSW) in May 2004. Prior to joining UNSW, I worked at the University of Western Sydney (UWS) for four years and at the NSW Breast Cancer Institute for three years. Although I am a full-time Senior Research Fellow (Applied Biostatistician) at UNSW, I work on secondment at the Westmead Breast Cancer Institute as the consultant statistician two days a week.

While working at the SELF (Self-concept Enhancement and Learning Facilitation) Research Centre at UWS I accepted an offer to do a PhD in Applied Quantitative Methods under the supervision of Professor Herb Marsh, a professor at UWS and Oxford University. I was awarded the PhD in 2003. In my PhD I examined the peer review process of the Australian Research Council (ARC) large grants. This had important implications on policy and led to major changes in the ARC peer review process. The multilevel cross-classified model has been accepted as the best-practice benchmark for research on peer review. I have been using my multilevel expertise at UNSW as primary care datasets and data from cluster randomized trials have multilevel structures.

At the CPHCE I have been providing biostatistical leadership and support for many projects relating to quality of care and health related quality of life, under the leadership of my mentor Professor Mark Harris. This includes longitudinal studies in diabetes, health literacy and prevention of chronic disease in relation to the SNAPW risk factors. These often throw up interesting associations: for example female patients reporting better physical health if they attend female rather than male GPs, and women smokers reporting clinically significantly poorer mental health than non-smokers. At the Breast Cancer Institute, I have conducted novel breast cancer research with Professor John Boyages including some research to improve current UICC stage of disease among others.

Research is my passion. If I can contribute my knowledge through research to improve the quality of life, even in a small way, I would consider it a service and an achievement.
Research capacity building

Research capacity building is an important part of the work of the Centre. It is an aspect of many of our projects, as we work with clinicians and policy makers in designing, conducting and interpreting our research.

Three of our activities have a very explicit focus on research capacity building.

The electronic Practice Based Research Network (ePBRN)

The ePBRN, coordinated from the General Practice Unit at Fairfield Hospital, connects general practices and other health services, such as Diabetes Clinics and Community Health Centres, in the Fairfield health neighbourhood.

The ePBRN builds capacity in two ways: as an infrastructure to enable researchers to conduct translational research, and a methodology to learn and teach about and conduct EHR-based clinical research. EHR-based research necessitates a sound understanding of multi-methods and realist approaches to the implementation and evaluation of complex interventions and the importance of good quality routinely collected data.

As the integrated research infrastructure develops with our vision of a network of local health neighbourhood ePBRNs, researchers from primary and secondary care will be empowered to conduct robust cohort studies, clinical trials, quality improvement audits and comparative effectiveness research cost-efficiently. The research scope is NSW-wide, national and international as illustrated by our growing national and international collaborations. This ePBRN work is one of the core activities, along with patient-centred informatics-enhanced care, that underpin the PHC Informatics Stream of the CPHCE.

The Primary and Community Health Research Unit (PCHRU)

PCHRU supports research within community health in south western Sydney Local Health District. It was originally funded by the Ingham Institute, and is now supported by the South Western Sydney Local Health District. PCHRU is a collaboration between SWSLHD Division of Community Health, University of NSW, University of Western Sydney and SWS Medicare Local. The three key activities of PCHRU for 2013 were the Research Mentoring Program, Research Culture and Capacity Review, and the establishment of the Community Health Research Advisory Group.

Since 2011 PCHRU has provided advice, guidance and support to over 20 practitioner-led projects within the SWSLHD Division of Community Health through the Research Mentoring Program. Research output includes six articles in peer-reviewed journals, two peer-reviewed conference papers for international conferences, four conference abstracts for national conferences, 14 conference abstracts for conferences within SWSLHD, one invited presentation and two newsletter articles on practitioner research. Six projects in this program are currently drafting manuscripts for submission to peer-reviewed journals.

The Research Culture and Capacity Review is a mixed-methods study investigating the facilitators, motivators and barriers to undertaking research in Community Health. The RCCR survey, involved 109 community health staff. A qualitative study is currently underway to explore the survey findings and develop recommendations for research capacity development work in the Division. A PCHRU Community Health Research strategy and Implementation Plan is also underway.

The Community Health Research Advisory Group oversees PCHRU’s work with the Division of Community Health. Representatives include members of the Community Health Executive and staff of Community Health.
Centre for Obesity Management and Prevention Research Excellence in Primary Health Care (COMPaRE-PHC)

Like other APHCRRI funded Centres of Research Excellence, COMPaRE-PHC has a role in building capacity in its particular area of research. In 2013 COMPaRE-PHC funded three postdoctoral fellows and three PhD scholarships (one of each at Deakin University, UTS and CPHCE, UNSW). There were a range of activities aimed to contribute to capacity development in the field, including a series of forums, seminars and policy roundtable discussions (a number of which included an international expert on obesity prevention, Dr William Dietz, who was co-sponsored by COMPaRE-PHC and PHCRIS). COMPaRE-PHC also established a website and e-newsletter to disseminate information to researchers, policy makers, clinicians and others interested in the prevention and management of obesity by PHC.

Mentoring and supervision

We also build research capacity through mentoring and supervision. This includes the work of the General Practice Unit at Fairfield in providing research mentoring and supervision for registrars involve in the GP training program, working closely with GP Synergy, the Regional Training Provider; supervision for higher degree candidates; and providing research experience for Independent Learning Project students from the Faculty of Medicine.
In 2013, two staff had research fellowships and five had PhD scholarships. The Centre also awarded top up scholarships to those on PhD scholarships of less than $25,000 per annum. Other higher degree candidates are listed later in the report.
Fellowships

Harris, Mark  NHMRC Senior Principal Research Fellowship. 2011-2015
Lloyd, Jane  NHMRC Training Fellowship. Addressing variations in the implementation of guidelines for preventive activities in general practice. 2011-2014

Scholarships

*Schütze, Heike  NHMRC Postgraduate Research Scholarship. 2011-2014
Williams, Anna  NHMRC Dora Lush Priority Postgraduate Scholarship. 2010-2013
Zapart, Siggi  NHMRC Postgraduate Research Scholarship. 2011-2013
*Also received CPHCE top up for lower paying PhD scholarships

Awards

Harris, Elizabeth. Award for Distinguished Research, UNSW.
Harris, Mark. Peter Baume Public Health Impact Prize, UNSW
Schütze, Heike. UNSW Post Graduate Support Scheme.
Zwar, Nicholas; Hermiz, Oshana; Comino, Elizabeth; Middleton, Sandy; Vagholkar, Sanjyot; Xuan, Wei; Wilson, Stephen F and Marks, Guy B. MJA Prize for Excellence in General Practice Research – 2013
TEACHING

Our teaching within the Faculty of Medicine, elsewhere in UNSW and for other universities and organizations allows us to share current research with students and enables staff to develop and maintain their teaching experience. Below is a summary of teaching by Centre staff in 2013.

Undergraduate Medicine at UNSW

## PhD Research Students

The Centre provides many opportunities for research students. In 2013 a total of 19 PhD students were enrolled at the Centre (including a number of CPHCE staff members\(^2\)). In addition, CPHCE staff co-supervised a number of students from other Universities.

My journey towards becoming a researcher and PhD student at CHETRE started in my home country New Zealand where I studied Law and Psychology. I was always curious about understanding how other people think and feel and the thought of standing up in court arguing for people’s rights appealed to me. My parents tell me how already at primary school, I would come home and tell them about various injustices I thought teachers had been perpetrating on children - I always had sympathy for the underdogs (or who I perceived to be underdogs) and a strong sense of fairness.

After completing my professional studies and being admitted to the bar I left New Zealand – following a nice German boy I had met rock climbing. My studies took a new turn, and I ended up studying a Masters in Public Health at Bielefeld University. I thought I had finished with law until one day in the library I came across a new book that looked at the relationship between health and human rights. It resonated with me. I clearly remember sitting on the floor in the library reading and reading feeling excited, which to be honest didn’t happen to me that often in my studies! I decided to focus my Masters thesis on health and human rights. At the same time I began working part time at the State Institute of Public Health North Rhine Westphalia in an EU funded project developing policy health impact assessment (HIA) methodology. HIA soon became the main focus of my research career. What I particularly liked about HIA is that it provided an opportunity for applied research that can make a direct difference to people’s lives. I also liked the focus on equity, and the potential for communities to use HIA as a tool for to protect and enhance their wellbeing.

We then moved from Germany to northern England, where I went to the International Health Impact Assessment Consortium (IMPACT), which is based at the University of Liverpool and forms part of the WHO Collaborating Centre for Policy Research on the Social Determinants of Health. I undertook HIAs and did research and teaching, a welcome change after years of being a student. The nice German boy had come with me and during our time there we had a daughter – Aife. The long wet winters and a desire to be closer to my family combined with a great opportunity to join the HIA team at CHETRE (not to mention the appeal of rock climbing in the Blue Mountains) then led us to Australia at the beginning of 2011. At CHETRE I have been encouraged and supported to begin a PhD that has given me the opportunity to combine HIA with human rights. CHETRE feels like a good fit for me – there is a sense of shared values with people working here despite the content of our work being so varied. This also translates in to a work environment which values people as a whole not just what they contribute to the job.

I can’t wait to see what happens next…
DISSEMINATION

2013 Annual Forum

Friday 2 August 2013, John Niland Scientia Building, UNSW Australia

The CPHCE Annual Forum is an important calendar event where we showcase our current research and recognise organisations and individuals with whom we have worked and have assisted us in our research. It is also a networking opportunity where our staff can meet and socialise with staff from our partner organisations. Over 140 staff, research partners and colleagues from interstate attended the 2013 Annual Forum.

Ian Webster Health for all Oration

Prof Eileen Baldry. Meet Casey- the $5.5 million 22 year old: Or how we have created complex needs and what to do about it.

Presentations

A/Prof Lynn Kemp. Use of data to measure program fidelity.

Prof Siaw-Teng Liaw. Integrating primary and secondary care record systems to assess quality of care and health outcomes for patients with diabetes & multi-morbidity.

Prof Mark Harris. Quality of preventive care in primary care – using practice data, linked administrative data and patient surveys across the 5As.

Dr Elizabeth Harris. Using EFFHIA to assess afterhours plans of Medicare Locals.

Panel Discussion

Christine Walker (Chronic Illness Alliance), Liz Marles (President, RACGP), Greg Stewart (SESLHD), Enrico Coiera (Centre for Health Informatics).
Awards and Prizes

**Individual Partnership Award**
Lou-Anne Blunden for Dr Teresa Anderson
Sydney Local Health District

**Organisational Partnership Award**
The Royal Australian College of General Practitioners

**Medicare Local Partnership Award**
Eastern Sydney Medicare Local

**Health Impact Assessment Award**
Debbie Masters, Hannah Barrington and Cassandra De Conceicao
Sydney Local Health District
Partners and Affiliates

We collaborate with many different individuals and organisations. Some of our main partners in 2013 are listed below.

**Partnership with Local Health Districts and Medicare Locals**

We have had very strong partnerships with our neighbouring health services. This reflects our history – our origins were in South Western Sydney Area Health Service – and the long term support that the Local Health District continues to provide. We conduct a significant part of our research with the Local Health Districts and Medicare Locals in central, south eastern and eastern Sydney. They keep us in touch with the realities of providing health services and we work together to develop and test new approaches. We receive generous support from the Local Health Districts, and are working to formalise research partnerships with each. We have also worked closely with the Medicare Locals, and look forward to similar collaboration with the Primary Health Networks when these are established.

- **Travel**
  - 2013: $145,137
  - 2012: $129,345
- **Equipment**
  - 2013: $25,952
  - 2012: $27,523
- **Other Expenses**
  - 2013: $65,175
  - 2012: $148,238
- **Contract Research Ohead**
  - 2013: $171,777
  - 2012: $113,673

**Total Costs**

- 2013: $4,975,696
- 2012: $4,261,328

### Operating result

- **Operating result**
  - 2013: $-331,268
  - 2012: $262,357

**Adj to 2012 Operating Result**

- 2013: $39,647

### Opening Balance

- 2013: $2,643,847
- 2012: $2,341,843

### Closing Balance

- 2013: $2,312,579
- 2012: $2,643,847

---

**Notes to the Statement of Financial Performance**

i) Due to the change in payment schedule for NHMRC income, interest is no longer earned on NHMRC funds

ii) The Centre also recognises in-kind contributions provided to it by UNSW that are not brought to account in the Statement of Financial Performance - this includes space occupied at Level 3 Building G27 - AGSM, Randwick

iii) Contribution to salaries of 7 CPHCE staff, Fellowship Enhancement for Professor Mark Harris & Dr Jane Lloyd

iv) ‘Other Income’ includes $228,674 of UNSW support to meet Enterprise Bargaining gaps in NHMRC projects

v) Income rec’d relevant to a prior year & outstanding invoices have been added and subtracted from the relevant categories of income

vi) 2012 closing balance understated by $39647

vii) Unpaid invoices as at 31/12/2013 total $258,122
